Rock Climbing Guide

LEGAL NOTE: All climbing is very dangerous & always at your own risk. Nobody is forcing you to climb. You choose to climb, so choose to go home before the risks become too high. Remember even small injuries can take 6 weeks to heal. No responsibility for inaccurate or incomplete information will be accepted by the scribe or any other body. The landowners accept no liability at all. Climbers take full responsibility for themselves at all times. Fixed protection will become unreliable, loose rock is common, solid rock becomes loose & RD writers make up most of the information, with a beer, at the computer. This RD is only a guide & is no substitute for experience, training, common sense & a touch of caution. So you are on your own...take care!

NOTE FROM THE SCRIBE: It took consistent effort, time, work & organization to get this guide ready for your pleasure...for free! Thus, please respect that all the information & photographs are strictly **Copy Righted**. Nobody "has" a lawyer, normally a lawyer has us...by the short & curlies. But I do know this lawyer, he's a bit of a dick, but apparently, he normally wins. Friends let's not get to see how much of a dick he really is. You are more than welcome to print out, e-mail or link to a web page this guide in its unchanged format, with logos & all information intact.

Many routes have been added or recorded for the first time in the last 10 years. Much detail was missing from the resources publicly available. This guide is an attempt to consolidate this info & available to everyone. As this is a web based guide it can be considered a work in progress. It is easy to change. So please send missing details, corrections, additions & adjustments to info@easterncaperockclimbing.co.za. All information will be greatly appreciated.

Big thanks to Andy Wesson for bulk of the information, the first guide & pics of the illusive Mark Berry.

ROCK: The Wall at Kirkwood is a thin wafer of quartz about a meter thick. Climbing is on both sides. There are 4 sport lines & 10 mixed or trad lines. Very limited potential for new lines.

HISTORY: More than 10 years after this crag was discovered, this sweet Wall lay completely forgotten. Till it was re-discovered after Andrew Wesson's RDs re-surfaced. This rediscovery was followed by a single rainy day of development, where the remaining lines were plundered. Unfortunately, all the routes are a bit short, but good fun and super limited walk in.

DIRECTIONS: Follow the R75 from Uitenhage to Jansenville. Turn R at the first Kirkwood turnoff. Through a four way stop and on towards Bergsig. After 700m Turn R at a T junction. A grave yard is 1.5km further along this road. The *Great Wall* is on the RH side 800m past the graveyard. Park in the small drive before the cause way.

Routes are recorded from the river to the fence.
