Rock Climbing Guide

Legal Note: All climbing is very dangerous & always at your own risk. Nobody is forcing you to climb. You choose to climb, so choose to go home before the risks become too high. Remember even small injuries can take 6 weeks to heal. No responsibility for inaccurate or incomplete information will be accepted by the scribe or any other body. The landowners accept no liability at all. Climbers take full responsibility for themselves at all times. Fixed protection will become unreliable, loose rock is common, solid rock becomes loose & RD writers make up most of the information, with a beer, at the computer. This RD is only a guide & is no substitute for experience, training, common sense & a touch of caution. So, you are on your own...take care!

Note from The Scribe: It took consistent effort, time, work & organization to get this guide ready for your pleasure...for free! Thus, please respect that all the information & photographs are strictly **Copy Righted**. Nobody "has" a lawyer, normally a lawyer has us...by the short & curlies. But I do know this lawyer, he's a bit of a dick, but apparently, he normally wins. Friends let's not get to see how much of a dick he really is. You are more than welcome to print out, e-mail & download this guide in its unchanged format, with logos & all information intact.

This guide is an attempt to consolidate this info & available to everyone. As this is a web-based guide it can be considered a work in progress. It is easy to change. Please send missing details, corrections, additions & adjustments to info@easterncaperockclimbing.co.za . All information will be greatly appreciated.

Big Thanks to **Rob Mac Geoghegan** for bolting most of the routes & for the effort of training hundreds of climbers & rescuers for more than 4 decades. Rob, "The Pope" of PE climbing & the true leader of Eastern Cape search & rescue has never been officially recognized or thanked. Big up to Rob for his dedication & his life of service. We salute you Rob! Rob you are a legend! This guide is dedicated to you!

Walk-in: ± 350m, ± 5min.

Time & Weather: Fairly shaded & sheltered

Potential: There is truly limited potential for more routes.

General: 20 short bolted routes, 4 short trad routes and some bouldering.

Access: No access restrictions.

Rock Type: Sandstone. Masekane is a bit short, but it is great for beginners.

History: Apparently Masekane was discovered by Tim Robertson in the '70s. He started using it for abseil & rescue training & opened a few routes. R. Ordendaal opened some of the early routes & started bolting at Masekane in the '90s. There has been consistent climbing & training to climb at Masekane for generations. Rob Mac Geoghegan has used Masekane to train hundreds of people to abseil & climb. More recently Tyson Baars has taken a stack of people for their first climb at Masekane. This means that more people have climbed at Masekane than at any other crag in the Eastern Cape. Derek Marshall sponsored most of the hangers & top anchors.

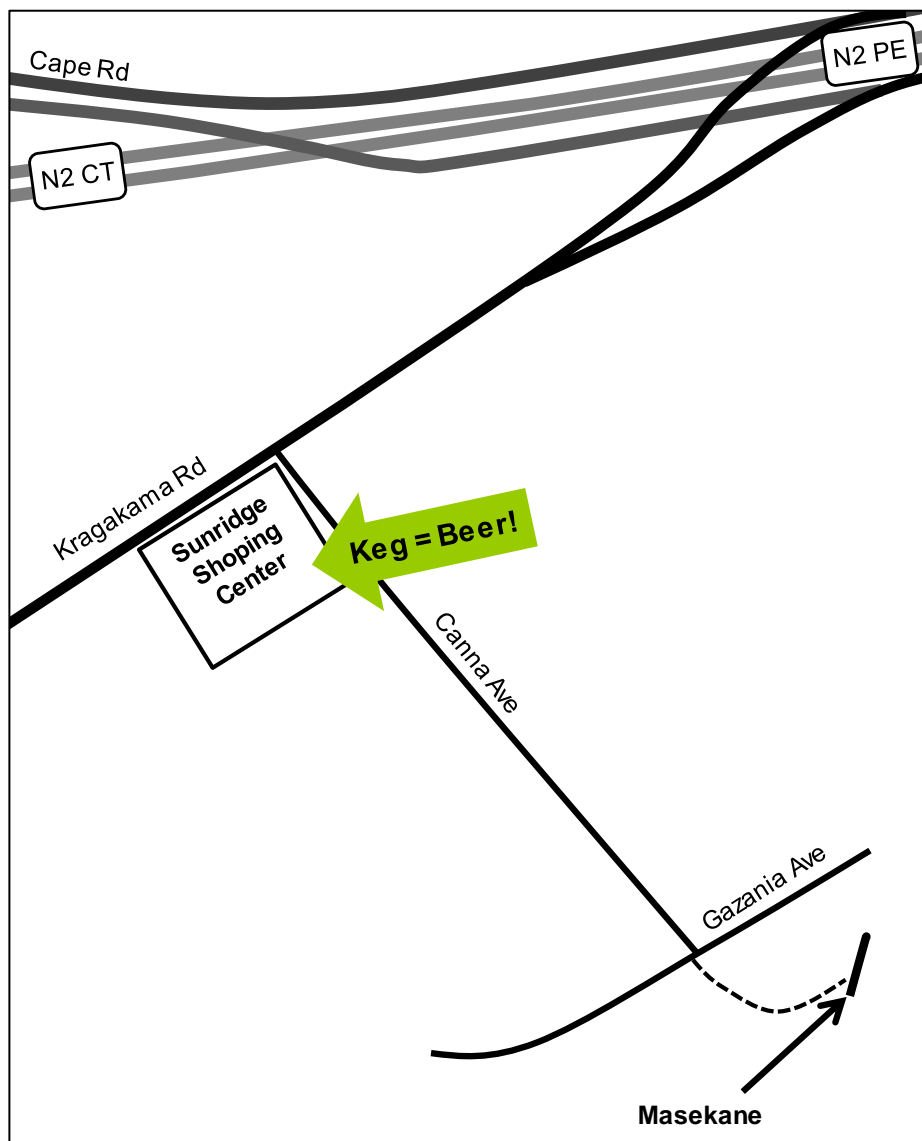

Hazards: 🐝 Bees: Beware there is an active hive above & L of *This is the Day* (15). These bees must be considered very dangerous. Don't climb *This is the Day* & don't disturb the bees. 200 stings can kill a person, there can be 20 000 bees in a hive. Minimum these bees could land you in hospital.

Loose Rock: There is a fair amount of crumbly loose rock that is still coming off the routes. Wear your helmet... it's a smart thing to do! Chicks dig fat helmets!

Crime: Masekane is isolated enough to be considered very dangerous when proximity to human traffic & dwelling is taken into consideration. A machete may come in handy for more than just the path. Take care...especially if there are women in the party. No couples on their own! Bigger groups are better.

Snakes: A few puff adders have been spotted over the years.
