Climbing Guide Hangklip | Queenstown

Legal Note: All climbing is very dangerous & always at your own risk. Nobody is forcing you to climb. You choose to climb, so choose to go home before the risks become too high. Remember even small injuries can take 6 weeks to heal. No responsibility for inaccurate or incomplete information will be accepted by the scribe or climb.co.za. The landowners accept no liability what so ever. Climbers take full responsibility for themselves at all times. Fixed protection will become unreliable, loose rock is common, solid rock becomes loose & RD writers make up most of the information anyway. This RD is only a guide & is no substitute for experience, training, common sense & a touch of caution. So you are on your own...take care!

Note from the scribe: Please note that this is a web based guide, easy to change, so send corrections, additions & adjustments to info@easterncaperockclimbing.co.za . You are welcome to print this out or use the info for a better guide. But please don't distribute in anyway other way. I look forward to first ascents being claimed, old pictures, forgotten notes...please send it all to me.

Please note that this is a work-in-progress. If you have any information, pictures or any routes where you are certain of location, this bumbling scribe needs as much help as he can get. The routes recorded in this guide are in no set particular order. Basically, there was a huge amount of guess work.

Access: Hangklip is on private land. The farmer is happy to allow climbing. Access is by arranged permission. Please contact info@easterncaperockclimbing.co.za to assist with arrangements.

Walk-in: About 1.5 hours if you are fit. The walk-in is steep & tough.

Thanks & Appreciation:

- Massive thanks to the landowner for welcoming climbers to camp & climb all the years.
- Andrew Forsyth, thank you for all your handwritten route description in the Port Elizabeth Camp Trails route file & also your personal climbing journal.
- John Moss for always being the first man on the ground, discovering so many places & writing the routes up in the MCSA Journal.
- Russ Dodding for various pictures, his poem Images of *Queenstown – Easter '84*, the copy of the SA Climbers Club 1984 Newsletter & pushing the guide.
- Mike McKechnie thanks for the pictures from the 1984 SA Climber Club Meet.

Time & Weather: The South Face gets shade basically all day. The East Face would get afternoon shade. Winter would be cold & miserable. Summer would be really hot & Hangklip would suffer thunder storms.

Potential: 32 routes recorded. There is a huge amount of potential. There have been very few climb trips to Hangklip since the SACC Easter 1984 meet.

Ethics: Gooi papa gooi!

Rock Type: Vertical dolorite, up to 180m high.

History: There are a number of fantastic Bushman painted sites to on the north west side of Hangklip. One of these sites has very fresh-looking paintings.

The rock climbing at Hangklip was discovered by John Moss in 1974. John discovered an amazing number of crags. Hangklip saw its biggest action when the SACC held their National Easter Meet 20-23 April 1984. At least 46 climbers attended & 27 routes were opened.

ER - Easy Ride – 14¹

John Ions & John Moss September 1974 (T)

This is the first climb on the south side of Hangklip & take a broken line on the far LHS of the wall. It starts about 50m R of the fence at a recess & a short steep wall.

P1 – 14 – 33m Ascend a large flake to the L of the short steep wall. Make an awkward pull out to the R onto the top of the protruding flake & continue R to a short chimney. Move L & then back R to a stance in an open gully.

P4 – 16 – 18m Take the LH crack up to the ledge.

P5 – 19 – 20m Between two off-width chimney cracks is a steep jam crack, up this to the summit.

P2 – 19 – 25m Climb the LH flaring off-width chimney on the L. Layback around a small overhang & jam up to a ledge on the L.

This is the same ledge as the one at the top of the 3rd pitch of *Solar Plexus*.

P3 – 14 – 12m take the break to the R of pitch 4 of *Solar Plexus*. Move over some piled blocks to the R.

P4 – 19 – 18m Climb the obvious crack on the L by means of some careful bridging, using some holds on the LH wall. Move back, slightly to the L at the top & onto a ledge. This is the same ledge as the one at the top of the 4rd pitch of *Solar Plexus*.

Spiritus Sanctus (?)

F - Firefly – 16¹

Paul Andersen & John Moss 17/11/1974 (T)

Firefly follows a line on the LHS of the great cleft break, about two thirds R of the LH end or the south face.

- P1 – 14 – 20m Start on the lower LHS of the cleft at the foot of a short-broken wall. Climb the wall easily, trend R to the foot of a short wide crack. Up the crack & continue up into the recess in the LH wall of the cleft.
P2 – 16 – 15m Leave the recess via a chimney on the L, the chimney is blocked by a series of chockstones.
P3 – 10 – 30m Up above the belay, then diagonally L onto the front face of a short wall.
P4 – 13 – 33m Over the wall & move to the L into a steep chimney, up the chimney past a huge chockstone to a large platform.
P5 – 13 20m Continue up the chimney to where it becomes blocked. Move L & up to a stance.
P6 – 11 -17m Climb the wall above. Easier rock leads to the summit ridge.

Howling Wolf – 19 ★★★^{2 4}

Alvin Wood, Keith James & Chris Radcliff, Easter 1984 (T)

This is a varied & sustained gem.

Start to the R of the water drip. A broken, partly vegetated, low angle blocky ramp, leads up to an obvious chimney.

P2 – 19 – 20m Climb groove above until it is possible to move R into a continuation of recess/crack to a good stance.

P3 - 20 – 30m Continue straight up crack, moving L at roof. Ascend the crack.

P4 Scramble to the top.

Gunge of a 1000 Campaigns – 21^{2 3 4}

Russ Dodding & Stewart Middlemiss, Good Friday 20/04/1984 (T)

The name *Gunge of a 1000 Campaigns* refers to the contents of Russ’ E.B.s (old school climbing boot/shoes) not to the quality of the route.

P1 – 16 – 35m Start directly below the large chockstone that is 10m R of the bivi cave, with the freestanding pillar cairn. Up to chockstone, stance on top.

P2 – 19 – 20m Up RH crack, where it flares, transfer to the LH layback crack. Up the layback crack to a large ledge.

P3 – 14 – 10m Up chimney to twin chockstones.

Alvin Wood, Julian Maund, Andy Wood, Andy Smith, Russ Dodding, Paul Schlotfeldt & Guy Robins, Easter 1984 (T)

P2 – 20 - 15m Layback the flake, moving L to the block. Move up to a small stance below a black crack.

P3 – 17 – 10m Climb the hand crack, moving L on crimps to *Ripped Off* stance. Abseil off or continue up *Ripped Off*.

For Your Legs Only – 20^{2 4}

P3 – A2 - 27m Climb the crack to belay under small roof below groove.

P4 – 17, A1 – 50m 1 point of aid through roof. Climb the gully to the top.

HH – Heffelump Hunting – 21, A2 ★★^{2 4}

Tarquin Holt, Tinie Versveld & Laurence Chambers, Easter 1984 (T)

Apparently, this was one of the boldest routes climbed on the SACC Easter 1984 meet.

Start at the obvious leaning pillar on the RHS of the south face, near the south east corner of Hangklip.

P1 – 19 – 25m Climb crack to L of pillar & crack above.

P2 – 21, A2 – 20m Continue up crack, through roof & up finger crack. Traverse R to stance, using points of aid where necessary.

P3 – 20 – 30m Traverse R, around the corner & up crack.

P4 – 20 – 15m Up through roof to summit.

Excellent layback at the top.

Cul-de-sac – 17 (?)⁴

Tony Maddison, Rob Brand & Doric Holmes April 1984

P4 – 16 – 30m Up the chimney to the top.

Squirt – 19^{2 3 4}

Dorick Holmes, Tony Maddison & Rob Brand, Easter 1984 (T)

Start 5m L of the *flying buttress*.

P1 – 19 – 40m

P2 – 16 – 22m

P3 – 16 – 35m

P4 – 16 – 20m

SR - Sibling Rivalry – 21, A1 ★★^{2 4}

George & Steve Mallory, Derie Van Eeden, Easter 1984 (T)

On the East Face, about 200m R of the corner where the South Face Meets the East Face, is a huge square, 13m roof ± halfway up the cliff, *the flying buttress*. Start just R of this huge roof.

P1 – 19 – 30m Climb up onto the 10m buttress on the LHS. From the RHS of the top of the buttress, climb a jam crack to a big ledge in the open book, below a layback crack.

P2 – 21, A1 – 23m Up the layback fist crack until it is possible to step L to stand delicately, using finger locks. Climb up another 2m to make a hanging stance.

P3 – 20 – 22m From the hanging stance, move R to a jug & a mantle. Continue up the crack to where the crack diverges & widens into a narrow chimney.

P4 – 19 – 30m From the stance, move R onto a huge ledge. Walk R to the end of the ledge & climb straight up to a stance below a recess.

P5 – 17 – 30m Up to the top.
